## Global Passenger Information System Market 2015-2019

**“ Global Passenger Information System Market 2015-2019 ”** is the latest addition to MarketResearchReports.Biz industry research reports collection.

### **Global Passenger Information System Market 2015-2019**

Covering: Market forecast and analysis of the global passenger information system market until 2019.

Market size and segmentations by products (hardware, software, and services), and by mode of transport (roadways, airways, and railways). It includes market shares for APAC, Americas, and EMEA. Top vendors analyzed by this report include Alstom, Cubic Transportation, GE, Hitachi, and Huawei

### **Market outlook of passenger information systems**

This research study considers revenues generated through passenger information system spending in airways, railways, and roadways. Technavios market research analysts project passenger information systems to reach a market size of approximately USD 20 billion by 2019.

Transport operators are looking to leverage emerging technologies to streamline their operations and make it more secure, reliable and efficient. Traditional IT vendors such as Siemens, Cisco, GE Transportations, and TE Connectivity are introducing real-time passenger information systems to address the specific needs of a rapidly changing travel environment for buses, trains, planes, and other modes of transport.

### **What is the key utility of a passenger information systems**

The upsurge in the average number of vehicles on the road has led to traffic congestions. Therefore, public transport services offering real-time information to passengers have become a necessity. Passenger IS encompasses many useful features such as emergency notification, passenger/public announcement, infotainment, and mobile applications. Passenger information systems allow passengers to get the most relevant information concerning the status of all kinds of transport mediums such as trains, airplanes, roadways buses, and cabs.

These systems involve the use of high-end data centers connected with wireless networks. These high-end data centers receive information queries and transmit relevant content to a web interface through back-end work stations. It enables passengers to access up to date information on the go using handheld devices or through media panels displayed at railways stations, bus stands or airports.

### **Global passenger information system market by products**

- Hardware
- Software
- Services

### **Global passenger information system market by modes of transport**

- Railways
- Roadways
- Airways

## **Geographical segmentation of the global passenger information system market**

- APAC
- Americas
- EMEA

## **Leading vendor analysis in the global passenger information system market**

- Alstom
- Cubic Transportation
- GE
- Hitachi
- Huawei

Market vendors will look to leverage the growing demand for passenger information systems in airports. Adoption of new emerging technologies at airports for enhanced efficiency is one of the major trends in the airport IT market. This report predicts, technologies such as beacon, geo-location, 3D face recognition, backscatter x-ray machines, bar coded boarding passes, thermal sensors, and video analytics to be implemented in several airports across the globe in the next four years.
